EDUCATION

Full Cycle MBA in Software Architecture	2023 - 2025
UNESP, São José do Rio Preto Computer science bachelor's	2013 - 2018

EXPERIENCE

Pray.com <i>Senior Fullstack Developer</i>	November 2024 - Present
· Built a content management platform with TypeScript and React, empowering religious leaders to create, manage, and distribute diverse content to millions of users. · Integrated AI-powered features including ebook parsing and automated audio generation, significantly reducing content creation time for creators. · Designed and delivered a usage-based billing platform, unlocking a new revenue stream and enabling granular monetization across the full toolset. · Implemented reusable rich-text editor components with markdown support and versioning, accelerating feature delivery across the platform. · Architected and maintained serverless backend with AWS Lambda functions, ensuring scalability and cost efficiency.	
Demand.io <i>Senior Fullstack Developer</i>	April 2022 - November 2024
· Led the core monetization systems initiative using Node, Nest.js and TypeScript, directly driving company revenue growth. · Designed and shipped a gamification system with bitcoin-based payments, boosting user engagement and retention for a core product. · Optimized SQL query performance and Kubernetes resource allocation, reducing API response times and cutting cloud infrastructure costs. · Refactored legacy codebases in PHP and Scala, improving maintainability and reducing bug resolution time. · Delivered frontend features with Vue to support new monetization and user-facing flows.	
Banco BV <i>Fullstack Developer</i>	October 2019 - April 2022
· Led migration of the internet banking platform from legacy Java 6/Struts to Angular, Spring Boot, and Apache Camel, improving system reliability and reducing maintenance overhead. · Managed CI/CD pipelines with Jenkins, Spinnaker, and Google Cloud Platform, streamlining deployment processes for the team.	

- Drove agile best practices within the squad, contributing to continuous process improvement and faster delivery cycles.

Accurate Software
Backend Developer

July 2019 - September 2019

- Maintained and enhanced enterprise applications using Java, Spring, and Oracle technologies.
- Modernized internal systems with Angular and Spring Boot, improving operational efficiency.

DXC Technology
Backend Developer

March 2018 - July 2019

- Maintained legacy enterprise applications using Java 6 and Struts, ensuring business continuity for critical systems.
- Contributed to Spring-based modernization initiatives to reduce technical debt.

Freelance
Fullstack Developer

January 2017 - April 2018

- Delivered end-to-end e-commerce and inventory management solutions for small business clients using PHP and Laravel.
- Led client engagements, gathering requirements and driving projects from inception to delivery.

Junior Enterprise of Computer Science (ECC Jr.)
Fullstack Developer / Project Manager

July 2014 - December 2017

- Managed development teams and led client meetings, gathering requirements and ensuring project alignment with business needs.
- Built a real estate management system and multiple e-commerce platforms, gaining hands-on experience across the full development lifecycle.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript/TypeScript (Node, Nest.js, Angular, Vue, React, Next.js), Java (Spring Boot), PHP (Laravel)
Databases	MySQL, PostgreSQL, MongoDB, BigQuery, DynamoDB, Redis
DevOps & CI/CD	AWS (Lambda, EC2, S3, SQS), Google Cloud Platform, Docker, Kubernetes, Jenkins, Serverless Framework
APIs & Tools	REST, Git, Microservices, Agile/Scrum

LANGUAGES

Portuguese	Native
English	Advanced
Spanish	Intermediate
