EDUCATION

UNESP, São Paulo State University 2013 - 2018
Computer science bachelor's

Full Cycle 2023 - 2025
MBA in Software Architecture

EXPERIENCE

JetBridge June 2026 - Present
Senior Fullstack Developer

- Building an AI-powered platform where users describe an application in a chat and get it generated, previewed live and published, working end-to-end with Next.js, React, Node and TypeScript on AWS infrastructure.
- Created a visual editing tool that lets users point and click elements in the live preview to tell the AI exactly what to change, making the app builder faster and more intuitive for non-technical users.
- Delivered team collaboration features, including project sharing and a real-time shared chat history, allowing multiple people to work on the same project and stay in sync.
- Worked through SOC2 architecture issues using SST (IaC) to make the system more compliant by improving versioning, encryption and observability of multiple AWS services.

Pray.com November 2024 - March 2026
Senior Fullstack Developer

- Built a content management platform with Node, TypeScript and React, empowering religious leaders to create, manage, and distribute diverse content to millions of users.
- Integrated AI-powered features including ebook parsing and automated audio generation, significantly reducing content creation time for creators.
- Designed and delivered a usage-based billing platform, unlocking a new revenue stream and enabling granular monetization across the full toolset.
- Implemented reusable rich-text editor components using React with markdown support and versioning, accelerating feature delivery across the platform.
- Architected and maintained serverless backend with AWS Lambda functions, ensuring scalability and cost efficiency.

Demand.io April 2022 - November 2024
Senior Fullstack Developer

- Led the core monetization systems initiative using Node, Nest.js and TypeScript, directly driving company revenue growth.
- Designed and shipped a gamification system with bitcoin-based payments, boosting user engagement and retention for a core product.
- Implemented a data pipeline with BigQuery to support real-time analytics, enabling data-driven decision making across the organization.
- Optimized PostgreSQL and MySQL query performance and Kubernetes resource allocation, reducing API response times and cutting cloud infrastructure costs.

· Refactored legacy PHP and Scala codebases and delivered frontend features with Vue to support new monetization and user-facing flows.

Banco BV October 2019 - April 2022
Fullstack Developer

· Led migration of the internet banking platform from legacy Java 6/Struts to Angular, Spring Boot, and Apache Camel, improving system reliability and reducing maintenance overhead.

· Managed CI/CD pipelines with Jenkins, Spinnaker, and Google Cloud Platform, streamlining deployment processes for the team.

Accurate Software July 2019 - September 2019
Backend Developer

· Maintained enterprise applications with Java, Spring and Oracle, and modernized internal systems with Angular and Spring Boot.

DXC Technology March 2018 - July 2019
Backend Developer

· Maintained legacy enterprise applications using Java 6 and Struts, and contributed to Spring-based modernization initiatives to reduce technical debt.

Freelance January 2017 - April 2018
Fullstack Developer

· Delivered end-to-end e-commerce and inventory management solutions for small business clients using PHP and Laravel, leading each engagement from requirements to delivery.

Junior Enterprise of Computer Science (ECC Jr.) July 2014 - December 2017
Fullstack Developer / Project Manager

· Managed development teams and client relationships while building a real estate management system and multiple e-commerce platforms.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript/TypeScript (Node, Nest, Angular, Vue, React, Next), Java (Spring Boot), PHP (Laravel)
Databases	MySQL, PostgreSQL, MongoDB, BigQuery, DynamoDB, Redis
DevOps & CI/CD	AWS (Lambda, EC2, S3, SQS), Google Cloud Platform, Docker, Kubernetes, Jenkins, Serverless Framework
APIs & Tools	REST, Git, Microservices, Agile/Scrum

LANGUAGES

Portuguese	Native
English	Advanced
Spanish	Intermediate
